Radon VAC Webinar

2012

Instructor: John Sterner

A. Description

This 20 minute webinar is designed to offer information and marketing strategies on the Radon VAC Mitigation System. It will cover design and specifications and why sidewall venting radon is safe. The instructor will give benefits of utilizing the equipment while providing the necessary information needed to promote and apply this system.

B. Course Objective

1. To familiarize representatives, engineers, salesmen, contractors or any other learner with this Tjernlund Products, Inc. system.
2. To provide the learner with the opportunity to understand the Radon VAC, why it is a safe, simple and subtle installation while saving the owner money.
3. To provide the necessary information needed to promote and apply these systems.

C. Course Topics

1. Design and Specifications
 - a) Safe
 - b) Simple
 - c) Subtle
 - d) Saves
 - e) Warranty
